DR. MEHMET OZ
Pennsylvania’s Doctor.
IS RUNNING FOR U.S. SENATE.
To Fight For US.

PENNSYLVANIA NEEDS A SENATOR Who Shows Up, Cares, and Fights.

FOR TOO LONG, politicians have taken us for granted.
Republican politicians don’t bother to show up – writing off the Black vote.
Democratic politicians take for granted that Blacks will vote for them, and so they fail to tackle our real problems.

DR. OZ IS DIFFERENT. He is committed to making a difference, and already has.

FOR DECADES, Dr. Oz promoted better health care for African Americans. He started HealthCorps 20 years ago and raised $80M to mentor millions of at-risk teens. He led the effort to encourage young people to become doctors and funded scholarship programs for #MoreBlackDoctors.

Dr. Oz believes that America has a sickness that divides people by race, tears apart families, and fractures communities. He’s watched as gun crimes have skyrocketed in our neighborhoods and inflation has hurt our families.

Dr. Oz’s opponent, John Fetterman, supports the radical policies that have hurt predominately Black communities:

Supporting sanctuary cities and open borders so drugs pour into our streets – even going as far as to say he’d legalize all drugs.
Opposing new energy exploration – leading to more inflation.

It doesn’t have to be that way. In the Senate, Dr. Oz is going to take a leadership role in proposing specific policies to help Black communities. In this pamphlet, you’ll find Dr. Oz’s specific proposals on:

- Addressing the cost of living
- Making our city streets safe
- Increasing educational opportunity
- Better health care
LIKE ALL GOOD DOCTORS, Dr. Oz wants to listen and learn. He’s traveling ALL ACROSS PA, listening to the hopes and dreams of voters from all walks of life. But most importantly:
Dr. Oz is going to show up. And he is going to fight for you. That’s how change starts.

ADDRESSING THE COST OF LIVING
Dr. Oz knows how inflation is crippling America, and it’s disproportionately hurting the least fortunate among us. It’s making everyday necessities like groceries cost more. Hurting small businesses like barber shops and bodegas. And hitting seniors, many of whom rely on Social Security, when they need every last penny.

Dr. Oz has a prescription:

★ INVEST IN PENNSYLVANIA AGRICULTURE TO LOWER FOOD COSTS. High food prices eat into our pocketbooks, so we need to dramatically increase the efficiency of America’s food production, much of which is done right here in Pennsylvania. Dr. Oz will fight for policies that encourage affordable food production – family farming, and local co-ops that will bring fresh, healthy, affordable foods into our neighborhoods. And Dr. Oz will work to improve the school lunch program to ensure our children are guaranteed a healthy lunch.

★ PROMOTE ENERGY INDEPENDENCE TO LOWER GAS PRICES. Pennsylvania’s natural gas and energy economy is being stifled by needless regulations causing prices to skyrocket. This hurts people who can’t “work from home,” and adds costs to transportation systems like SEPTA. As Pennsylvania’s Senator, Dr. Oz will support an energy policy that invests in solar, wind, natural gas, and many others. Having a country that does not rely on foreign sources of energy will lead to lower gas prices and more affordable living for all.

★ ELIMINATING TAXES ON SOCIAL SECURITY FOR OUR SENIORS. For many, Social Security is a critical supplement to a lifetime of saving. Dr. Oz believes that Social Security should not be taxable for income-tax purposes. You earned it, you should keep it.
**MAKE OUR STREETS SAFE**

We deserve to be safe in our homes and neighborhoods, but the policies of politicians have made our communities more dangerous than ever. Amazingly, Dr. Oz’s opponent, John Fetterman, supports releasing cold-blooded murderers from prison. We shouldn’t be arresting folks for smoking marijuana, but violent criminals and dangerous gangs should be prosecuted.

**JUSTICE FOR MEEK MILL AND BUILD ON THE FIRST STEP ACT.**

The First Step Act was a bipartisan sentencing reform bill backed by both Democratic Senator Bob Casey and Republican Senator Pat Toomey that, among other things, eliminated certain racially discriminatory sentencing discrepancies. Dr. Oz believes that we can go further in analyzing federal penalties that are unfair, and reform our system of justice to make sure equal protection under the law is upheld. He further believes that what happened to Meek Mill was wrong, and even hosted Mill on his show. He also supports a congressional investigation into the actions of Judge Genece Brinkley.

**SUPPORT COMMUNITY POLICING.** Dr. Oz will promote community policing, where police and the local community work together in an open and transparent way to fight crime. Communities should know and trust their local police officers. They should be familiar faces that the community feels safe around.

**END “SANCTUARY CITIES”**

Dr. Oz stands with former Philadelphia Mayor Michael Nutter who wants to end Philadelphia’s “sanctuary city” policy, which allows violent illegal aliens to move into our communities. We need to allow local law enforcement to cooperate with federal authorities when an illegal immigrant is detained for a crime.

**JUSTICE FOR GEORGE FLOYD.** Dr. Oz was heartbroken by what happened to George Floyd, and featured the issue on his television show. He believes racial targeting is unacceptable, and will stand shoulder to shoulder with members of the Black community to be their voice in addressing injustice.

“We shouldn’t be arresting folks for smoking marijuana, but violent criminals and dangerous gangs should be prosecuted.”

“We shouldn’t be arresting folks for smoking marijuana, but violent criminals and dangerous gangs should be prosecuted.”

“Dr. Oz stands with former Philadelphia Mayor Michael Nutter who wants to end Philadelphia’s “sanctuary city” policy, which allows violent illegal aliens to move into our communities. We need to allow local law enforcement to cooperate with federal authorities when an illegal immigrant is detained for a crime.”

“Dr. Oz was heartbroken by what happened to George Floyd, and featured the issue on his television show. He believes racial targeting is unacceptable, and will stand shoulder to shoulder with members of the Black community to be their voice in addressing injustice.”

“We shouldn’t be arresting folks for smoking marijuana, but violent criminals and dangerous gangs should be prosecuted.”
BETTER HEALTH CARE

Dr. Oz’s lifelong passion has been health care. As one of America’s most prominent heart surgeons, Dr. Oz knows that a healthy body and mind can lead to all sorts of positive outcomes.

**Dr. Oz has promoted:**

- **#MoreBlackDoctors**
  
  Studies show that Black patients are more honest about their needs with Black doctors, and the lack of diversity costs lives. Dr. Oz supported a scholarship program for more Black doctors in medicine, and believes that the federal government can do more to increase medical school attendance, like increasing investments in STEM education and mentoring high school students to increase awareness of promising jobs in health care.

- **Reducing Deaths From Drug Overdoses**
  
  Dr. Oz has seen firsthand how drugs have ravaged our neighborhoods. He highlighted the drug problem in Kensington on his television show and urged leaders to take action. As Senator, Dr. Oz would fight to close our borders so deadly drugs cannot be smuggled into our communities by Mexican cartels. And he would fight to put addicts into detox centers and fund rehab programs to save lives.

- **Healthy Food**
  
  Dr. Oz promoted healthier diets on his show, was appointed to the President’s Council on Sports, Nutrition and Fitness, and hosted First Lady Michelle Obama several times on his show to promote her “Let’s Move” initiative. Dr. Oz will work to raise awareness in Pennsylvania and around the country, such as encouraging more programming dealing with physical health through the Corporation for Public Broadcasting.

- **Increase Access To Affordable Medicines**
  
  Bureaucrats slow down the process for making medicines available over-the-counter, which drives up prices. Dr. Oz believes that regulations prioritize profits for middlemen in the healthcare system, and will work to change things to lower costs for all Americans.

- **Investigate The Baby Formula Crisis**
  
  As Senator, Dr. Oz will demand answers from the FDA, and he will make it his priority to develop legislation to make sure that American moms never have to worry about accessing affordable nutrition for their children.

“As Senator, Dr. Oz will fight to put addicts into detox centers and fund rehab programs to save lives.”
A Letter From Dr. Oz.

Dear Neighbor,

America made this immigrant kid's dream a reality. Hard work and opportunity allowed me to succeed and give back. My career went from being a surgeon to hosting my own TV show, with a 60-episode stint in between as the health expert on The Oprah Winfrey Show. Seeing a dire need in Black communities for good doctors, I started a scholarship program to train more Black doctors. I hosted free health clinics across Pennsylvania and founded HealthCorps, which has helped millions of at-risk teens including many in Philadelphia and Pittsburgh.

But John Fetterman’s radical policies put their future at risk - inflation, open borders, crime.

I’m running to bring change, heal our divided nation, and fight for a better future for our families.

I hope to earn your support.

Sincerely,

Dr. Oz
As a physician, Dr. Oz has for decades diagnosed problems and come up with solutions for his patients. He’s promoted accessible and affordable health care.

Dr. Oz understands.
He listens.
Dr. Oz is uniquely qualified. And he has a real plan to bring the change we need.

VOTE DR. OZ FOR SENATE.
